

Kindergarten Kicking Off

Emily enjoys playing outside during recess.

Wow! What an exciting time Mrs. Marie has with her four and five year olds. There is never a dull moment but Mrs. Marie knows how to keep things in order.

All the students LOVE Mrs. Marie and she really loves them.

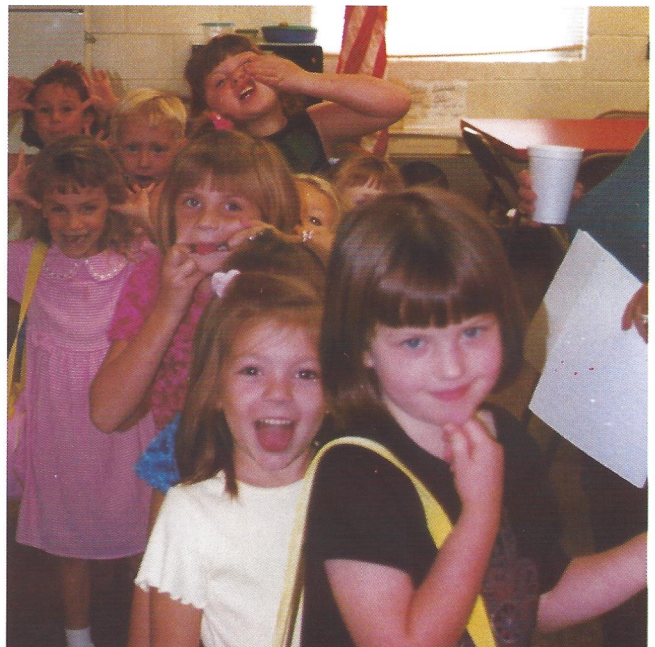

As you can see in the below picture, they love to clown around but they also know they are in class to learn and they take full advantage of that. These young students can read and do math problems that surprise many people but it is no surprise to the AJA family because this is the goal of our kindergarten class at AJA (to introduce students to the learning process and discipline required to reach that goal).

There's time for play, rest, singing, poetry, and Bible verses and you will be able to see many of their accomplishments at May Day and Kindergarten graduation.

Keep up the good work, Kindergarteners! We're looking forward to you moving into "big" school and beginning first grade!

This energetic group enjoys a wide variety of activities from kickball to cooking.

With tummies full, the kindergarteners are ready to head outside to play.
