The band was organized in 1956. No one knew what it meant to play in a band though many of us had dreamed about it.

You should have heard us. Even to blow one note was an effort. Improvement came but oh! so slowly. We surely had a lot to learn.

During the next two years some members graduated. Others dropped out. In the 1958-59 school year, we have had 32 members and have made fifteen appearances.

Last summer there were six who attended the Band Clinic at Clemson College. While there they learned a number of things but most of all they learned to march.

During the year the band members have practiced marching. Again we have made steady improvement.

We were proud to say we had learned three hundred pieces of music.

Looking forward to the next school year is more pleasant because of our band and its director.
