

Administration and Faculty

The Board of Trustees, Administration, and Faculty believes that each person should be enabled to live a useful and satisfying life. To this end, the schools shall strive to develop in young persons the factors---knowledge, skills, habits, understandings, attitudes, and character traits---essential for rich personal living.

The interest of students, parents and homes, schools and communities are best served by able administrators with faculties devoted to high ideals and ethical standards. To this end, the Board of Trustees and Administrators are constantly striving to develop such a staff.
