

A study of "Oscar" (the human body) is essential in the Junior High School.

## SCIENCE

In this atomic age, our school attempts to give each student a proper foundation in general science, biology, chemistry, and physics, in order to prepare him for future challenges.

Many mysteries are revealed to Bells students in

MR. S. W. LYTCHFIELD  
Math and Physics

MRS. H. A. ROBERTS, JR.  
Science and Biology

MRS. JACK SEASE  
Science

the classroom and lab, where they also find adventure and excitement.

It is through this department that some students may become interested in a science career.

Dissecting a Mud-Puppy — an enjoyable part of Biology for Rita and Jane.
