

Livestock and poultry production make up a major part of the course in vocational agriculture.

AGRICULTURE

Our course in Vocational Agriculture offers extensive training in agriculture. While classroom work is basic, field trips, supervised farming programs at home and Future Farmers activities are major parts of the course.

The course is broad enough to be helpful to those students who will not farm but will follow an occupation within the field of agri-business. Much emphasis is placed on leadership and citizenship.

MR. A. L. SMOAK
Agriculture

Soil conservation receives attention of students.

Students learn to make useful items for their home and farm.
