SOPHOMORE CLASS OFFICERS

As the class of '71 leaves, the class of '73 steps up to fill an empty space in the never ending cycle.

The life of a sophomore is a good example of an experience. First one must set a basis on which to work, then, when one has classified and filed the accumulated knowledge one can proceed to the more complicated problems.

The sophomore does have his breaks during the school year to take it easy. After all, hundreds in C.M.A.'s past years have met the challenge and trampled it in the dirt. So, if the sophomore feels that he is oppressed with work, he should look back into C.M.A.'s history and see the example of those who survived their sophomore year.

As a final word, summer is near and after all 1973 is not too far in the future. We would like to wish all the luck in the world to the seniors of '71 in their future years as they leave us to carry on the past traditions and lead as men; Goodby and thanks for the guiding hand and the reference to your past experiences.
