

SQ3R's out. SPRS is in.

Survey, question, read, recite, review. So it was last year, but today it's skim-scan, preread, read, summarize. As a major academic innovation this year, students work initially in English classes to improve their learning capacities through a formalized study skills program produced by Sensa Educational Systems, Inc. of Houston, Texas. Application is throughout course work.

Also new is a biweekly Dean's List, implemented by new Academic Dean Major Kelly Schrader, which recognizes academic achievements of students whose grades are 90 and above in every course. A real boon to the academic program is the completely rehabilitated library, enlarged and featuring a spacious audio-visual center.

An extension of the classroom is club membership and activity. CMA, of course, recognizes academic excellence, but education extends beyond classroom learning activity. Extra-curricular opportunities range from cultural enrichment through Fine Arts Club participation to recognition of intermural sports lettermen through Block "C" Club membership.

Perhaps most prestigious is Delta Kappa Sigma honor society, an elite group of juniors and seniors dedicated to cultural activity and scholastic achievement. Each member's selection results from faculty approval after the individual has established strict academic, military, and behavior standards. With Captain Lachicotte Zemp as adviser, a significant contribution to the community is DKS's semiannual publication of *Cadet*, a literary magazine which promotes creative achievement in literature and in art.

Under guidance of Captain Scott Sloan, the Debate Team stays well-informed on controversial issues in our world today. Debaters' ability to respond quickly and articulately has, through regional competition, won them membership in the National Forensics League.

Academic Team members are serious-minded about intellectual competition. Under direction of Captain Glenn Bemisderfer, the team test their knowledge in competitions such as the Winthrop Challenge, Model United Nations, and the Science Bowl. The team grows and learns through these competitions and participation improves the minds of members.

MSG Marvin McCullough instructs Leadership Education and Training (LET), first-year JR ROTC class here.

Debate Team members: Justin Campbell, Rob Whitmire, Radi Clytus, Philip Bethune, Will Rice, Ian Bailey, Charlie Robinson, William Pennell, Chris Bishop, Stuart King, Jerry Sheally.
