

Developing the whole man

Education goals are to develop the whole man, mentally, physically, morally. Cadets enjoy personal, ongoing contact with teachers and with staff to promote these ends. Academic framework is college preparatory, a curriculum of English, social studies, mathematics, science, and foreign language training. Small classes, such as Algebra I taught by Major Leigh Dellinger (opposite, left) and Chemistry, by Capt. Thomas Hesson (opposite, below), in the lab with Billy Dial and Jason Jesseph, provide the individual attention which enables students even with previous academic problems to succeed. Regular study periods and daily homework assignments develop self-discipline. David Stepp (bottom, left) makes the most of his studyhall and Jeremy Estroff (bottom) receives help from BJ Lathan.

Besides standard coursework, driver education and first aid training offer practical preparation for life. LTC Stephen Mowe (opposite, top right) assists a Red Cross instructor while Stephen Hayes, Beau Markolf, Tommy Brown, and Charlie Beam look on. For the musically inclined and talented, Capt. Vernon Clamp conducts band class (below) on the football field.

The men behind curricular and extra-curricular activity are Dean of Students LTC James Dallas and Academic Dean Kelly Schrader (right).
