

Unless the looks on the faces of Prophet, Harman, and Trovato are deceiving, LTC Roberts has found a way to make calculus amusing.

On Ed Op Day seniors Ceasar Wright and Ricardo Priester get information on the College of Charleston.

Preparing for Success

The academic program is the focal point of life at CMA. Twenty-four hours a day cadets are surrounded by books, classes, ideas, people, and activities centered on learning. Young men who have given little thought to the consequences of schooling live side by side with others totally dedicated to preparing for the future. The result is that those who have waited to begin to work begin here to prepare themselves for success.

The partnership between cadets and instructors is special. Meeting in the classroom, in the barracks, in study hall, on campus, on playing fields, and in the gym, in clubs and off campus, faculty members work to help cadets focus on real life and real success. The result for those willing to make the effort is the satisfaction of a job well done and the reward of an education for life.

-LTC Kelly R. Schrader

The Science Club used Halloween as an opportunity to present entertaining chemical experiments. MAJ LePage, science instructor and Science Club sponsor, explains what is happening to Mantei, Peterson, Maxwell, Pope, EE Mork, Phillips, and AJ Bryant.
