Academic Progress

A new computer-facilitated reading program and a course in astronomy lead the additions to the Camden Military Academy curriculum in 1998. New titles in the library, particularly in the reference section, have increased student research capability. More computers and computer applications become part of the curriculum-methodology mix each year. Along with the new, that which has served us well in the past forms the core of our approach--small classes, highly qualified teachers, and monitored study halls. We will continuously evaluate our curriculum and methods to determine effective ways to help our young men learn.

LTC Kelly R. Schrader has served at CMA for eighteen years. For the last twelve years, he has been Academic Dean. He holds bachelor's and master's degrees from the University of South Carolina.
