

Computing

The varied use of computers pervades the CMA campus. From research to paper writing to note taking to games, computers are in use virtually every second of the day in classrooms, in the library, in the barracks, or on benches. Laptops are becoming more prevalent as students discover their remarkable versatility in and out of the classroom.

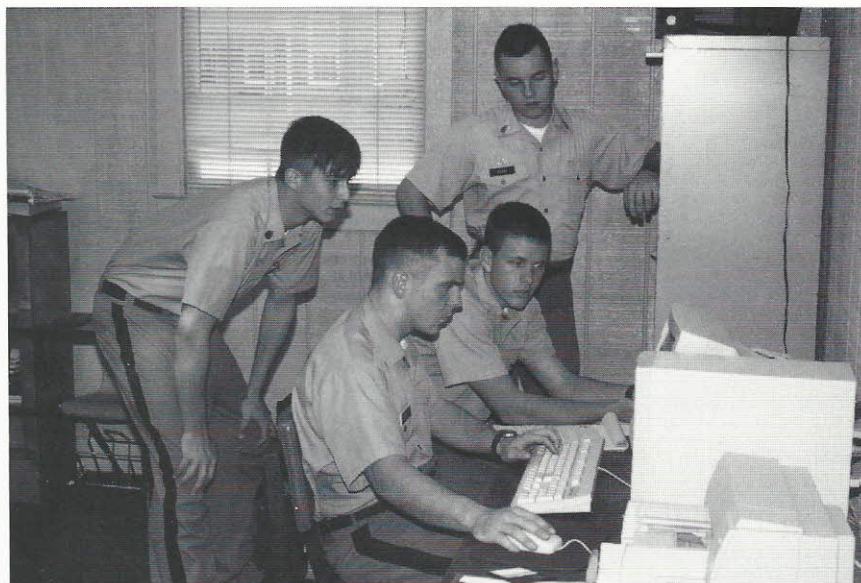

LTC Robert Thorp, computer science instructor, guides Jason Henderson through an exercise in the computer laboratory.

As Dale Wilson observes, Ben McGinnis works on a final draft in the library.

Mrs. Melinda Kane, librarian, uses the computer in a variety of applications. The library internet connection enables her to provide students with resources that are not on the library shelves.

Excalibur Staff members Jason McGoldrick, Nick Bliss, and Jason Crawford advise Iain Boyd as he nears completion of the senior section in the 1999 yearbook.

One of the many ways in which junior Matt McKinney uses his laptop computer is taking notes in class.

As DuPree watches and Campbell works, Friese finds time to play a game.
