The Soccer Challenge involves cadets “juggling” a soccer ball with their feet and shooting at a soccer goal while blind-folded. In the Bucket Walk cadets have to carry a five gallon bucket of water in a relay with team members while being timed and without spilling the water.

momentous achievement

At the baseball field, cadets encountered the Amoeba, Rifle and Artillery Challenges. In the Amoeba, cadets must complete an obstacle course while tied tightly together with a rope and while being periodically showered in freezing water. The Rifle Challenge requires cadets to run about half a mile and to then fire rifles at targets while trying to control their heart-rates and breathing.

ah-ha moment

At the parade field, they faced the Centipede, the Beam-walk and the Balloon challenges. The Centipede Challenge entails five or six cadets walking on two heavy beams. With each step, they must, as a team, lift each other like a pair of massive shoes. The Beam-walk involves a team of cadets helping each other balance on a four inch beam, while each cadet is helped around his teammates. In the Balloon Challenge, pairs of cadets standing back-to-back, carry a water balloon squeezed between them through a designated course without popping or breaking their payload. The lacrosse field hosted the Weightlifting, the Frisbee and the Glider challenges. The Weightlifting challenge entailed cadets lifting weights corresponding with their own body weights, and in trying to push as many repetitions as they could.
