## FIFTH YEAR MEN

The fifth year men at Carlisle consists of those boys who entered the eighth grade here in 1963. These few men, six in number, can be considered the backbone of the school. They have seen all of the changes that have taken place over their five year's here at Carlisle, the biggest of which was

the change over from the N.D.C.C. Military program to the R.O.T.C. program at the beginning of their fourth year. This along with minor rule changes, gives these boys a sense of great responsibility, because they feel they have had the greatest amount of influence on these changes.
