

REALITY BYTES

REAL LIFE - REAL PEOPLE - REAL ISSUES

As the new year crept its way through the first few days, students became more familiar with the faces and the changes that enveloped them. While students and teachers adjusted to these changes, goals were created. Our goals this year, focused on bettering our school and upgrading our academic system. Our dedicated teachers began the Total Teacher program and

an abundance of modern technology was added to our school system. The seniors concentrated at last, while freshmen taking their first steps made differences in our student body. These differences gave our school variety. Variety gave each of us a chance to be unique, and with that chance lies opportunities in the real world. Sometimes reality bytes!

~Maegan Causey

Sophomore Morgan Mabry gives it his all. "I love the sport and doing my best is important to me and the team," Morgan said.

Seniors Jessica Brilhante, Jessica Steele, and Amye Stivender play the game twister. "We are in Mr. Smith's Teacher Cadet class, and we just took the time to have fun," senior Jessica Steele said.
