The cream of the crop, the one and only, Academic team. Those students achieved over and above standards and recieved this membership with pride. The practices held after school helped them to reach academic excellence. They finally recieved their chance to shine. The team went off to matches to test their intelli-

gence as well as their ability to work under pressure. To answer questions took a lot of team work. "You have to think fast and correctly," junior **Ashley Singleton** said. Students are challenged by taking an Academic team test. This test is extremely difficult and it requires an abundant amount of off the wall informa-

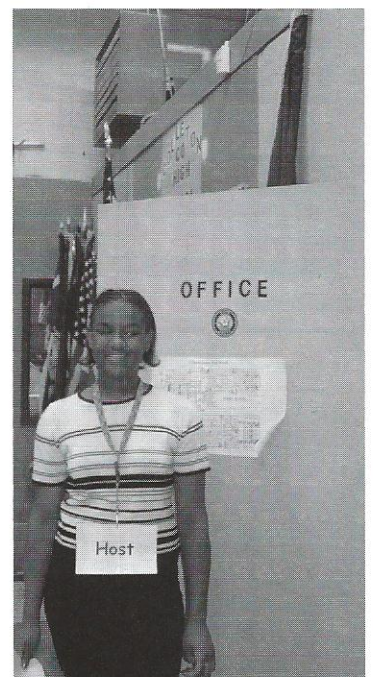

tion. Students could have taken the test during class and after school, which became the determining factor of their team membership.

Working hard on the blue print express, senior **Taylor Smith** tries to make the blue print a success. "I enjoy being on the academic team because it helps me improve my knowledge by competing with other students," Taylor said.

Getting ready for the ROTC Christmas play, sophomore **Jessica Stephens** waits for the signal to begin. "Being on the academic team can sometimes be hard because the competitions get harder and you have to study a lot more," Jessica said.

Reviewing for the upcoming match, **Coach Smith** explains to the Academic team the importance of subject matter and how it is important to everyday life. "I like working with the academic team members because it helps me to help others by competing and testing their intelligence with each other," coach Smith said.
