

The

Chemistry Creation

Science

Year after year the type of science changes and hopefully you have learned something. At least you may have had fun. There are many types of sciences like marine, biology, earth, and chemistry. "Some parts of science in life are essential but most of if I don't really need," junior Kelly Varnado said.

Whether you need it or not it's a great experience to go through.

-Edward Aiken

"In science I learn better by reading books and listening to teachers," sophomore Jakeem Wright said.

"In elementary school science was a lot easier than it is in high school," junior Danielle Craddock said.

"I believe the highest average I got for science was a ninety six," senior Leslie Lawron said.

"My favorite teacher in school for science is Coach Polk because he does experiments and we watched movies," senior Lauren Sherrill said.
