## Dedication!

In the sport of football you need dedication, pride, determination, and tough skin. Year round the team prepared physically and mentally with each other to become the best they could possibly be. Waiting on a chance to show everyone what they had, those players worked in the unforgiving sun over the entire summer. Many things kept those players dream alive to play for the team, and seeing the dream in progress is what made the team come together. "I stay dedicated to football by doing my work in class, coming to practice everyday, and doing what I can to help out," sophomore Andre Collum said.
