

# OUT of the Past...

# INTO the Future!

As the year kicked off, a blast of new experiences rushed into the doors of Colleton County High. There were so many new challenges in this old building, and this was the last year to cherish them here. The students looked forward to the new building, while the teachers flashed back to all of the memories that they have acquired over the years. Although many changes took place this year, next year will be an overwhelming new experience for everybody. The student body will have to adapt to even more new changes, and a totally new environment. All of the students will be like freshman again. This is our time to reflect on the past, and look towards the future.
