Undefined

We are all undefined. There is no person in the entire world that is the same as anyone else. This fact held true for the students at Colleton County High School. Each student either had a real word or a word made up of their own accord that said exactly who they are. Most didn't realize what position we held in the history of Colleton County High School, but we all could make history at this school. Whether we made a big accomplishment that would last through the years or it was a small milestone made, each student and teacher alike had the chance to make a difference. In doing so, we showed how the student body of Colleton County High School was truly undefined in each and every one of their own ways.
