

# HCA

HCA, or the Health Careers Academy, is the second New Tech Network affiliated program at CCHSI. The 2017-18 school year marks the inaugural year for the program. HCA curriculum offers high school students who wish to pursue a career in health care the chance to experience those fields in an exploratory academic setting. Problem-based activities demonstrate the use of collaboration, oral and written communication, and the strong emphasis on math and science necessary for successful health professionals.

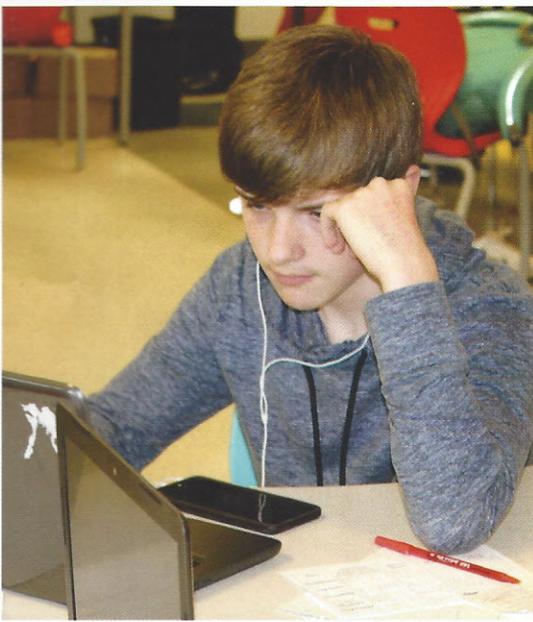

HCA Mauricio Forero says, "HCA is a roller coaster ride for us new freshmen. It's an amazing and inspiring experience."

Keyondra Kryar said that HCA is a great program that is full of caring people who help her achieve her goals.

Low Country Area Health Education Center (AHEC) has teamed up with HCA to provide a direct community connection to health care careers. The students in this picture are the first group to have completed the first module for AHEC content. *Congratulations!*

Zachary Miles takes advantage of finishing his work early to study for the big test. HCA encourages collaboration with problem-solving to achieve independent learning goals.

1. Freshman Montaijah Colleton and Jalynn Davis say HCA has helped them mature in so many ways. They are really a family and are growing together day by day.

2. Freshman Adam Padgett (left) says, "One thing I have done in HCA so far is write down some goals, and now I'm trying to achieve them," as he works with friend Lucas Lutz (right) on the group tasks.
