

# HCA - CNT - Health Science Connection:

The HCA is only in its second year, students at CCHS have followed the Health Science career path for over a decade. In these CATE courses, students throughout the high school build a strong knowledge and skills base for careers in health care. Senior students achieve CNA, Certified Nurses Assistant status before they even earn a

SMILE FOR THE CAMERA!

Senior Jim Bailey (left) is a CNT student who crosses borders to Ms. Brawley's Bio2 class: "HCA classes not only teach you how to be a productive and better student but also how to better your skills and knowledge in the career field you're going in." Jim is an asset to both of the New Tech programs as CCHS.

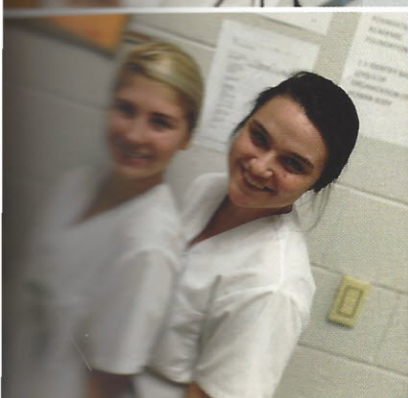

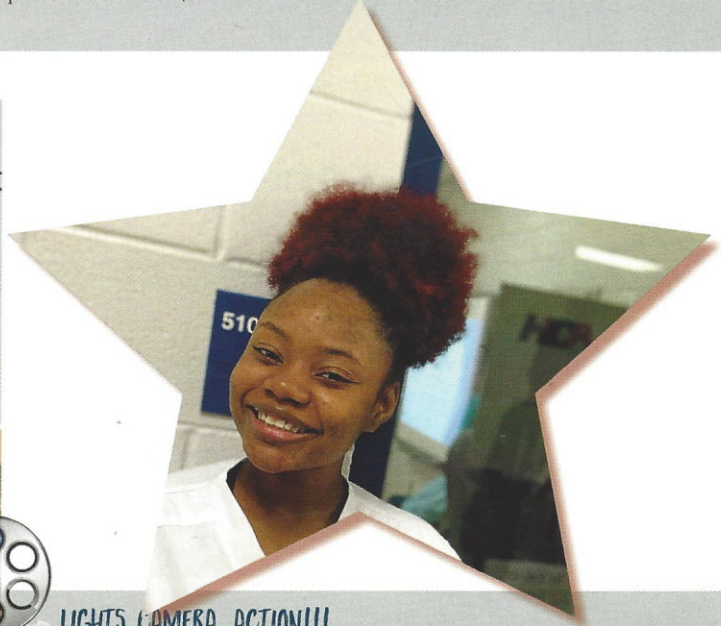

Lauren Herrington (12, right) applauds the non-health science teachers that support the students on this pathway: "My favorite thing about Ms. Peace's English 4 class is that she talks about reality, not a lot of out teachers here do that. Right now we are going over parts of speech to be better communicators. She makes us be more engaged in learning. I look forward to her class everyday, at the end of class she makes us feel like we all have accomplished something."

One thing senior Myesha Adams (below) loves about Ms. McMillan is that she takes her time teaching her students, and she doesn't criticize them when wrong. She simply corrects them in the nicest way. "Ms. McMillan has a very good relationship with her students, and I feel like she wants all of us to succeed."

TAKE 5! (AND THEN GET BACK AT IT!)

Leiana Rivera, a junior, says that when she walks into Mr. Pearson's class, she expects a good grade and a good learning environment. She says he can be humorous, but as a teacher with students from all of CCHS (LEAPS, IDEA, CATS, SHHS, and the project-based HCA and CNT programs), Leiana knows Mr. Pearson expects his students to work hard.

LIGHTS, CAMERA, ACTION!!!

Amber Warren (12) and Breanna Varnadoe (12, far left) had a great experience in the Clinical Program because it's a way for students perusing the path of nursing. While Laura Lucas (12, near left) says the best way to go further in her medical career is to come in Ms. McMillan's class with the mindset to learn as much as you can.
