Field Trips

Field trips are an important part of learning. Mrs. Griffith stated that she feels field trips make learning fun. Most teachers feel it is vital to rounding out their students' educations. All classes, kindergarten through Seniors, take field trips.

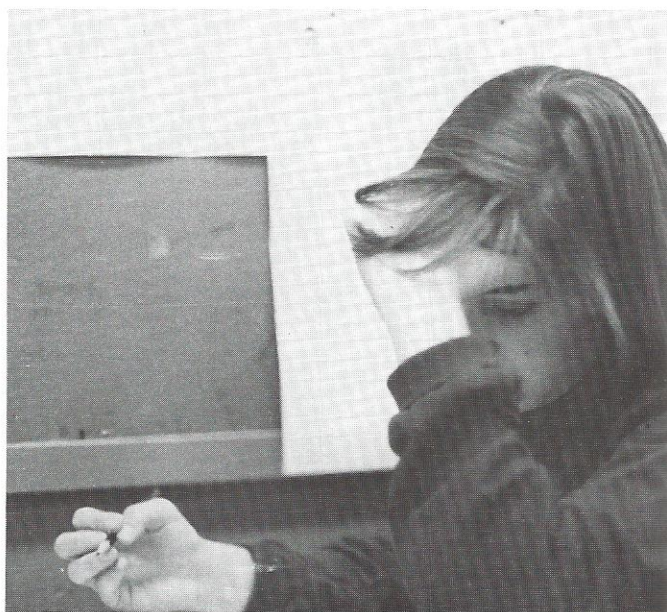

The kindergarten and first grade classes traveled to see a Christmas play at the Dock Street Theatre. The second and third grades went to the Columbia Zoo to see the dinosaur exhibit in the fall. The seventh grade saw *The Music Man*, produced by the Young Charleston Theatre Company.

The freshman class journeyed to the South Carolina Electric and Gas, Co. plant in Canadys. After taking a tour given by Winfield Simons students said they enjoyed finding out how power is produced for Walterboro and the surrounding areas. Mrs. Folk took her AP Spanish class to see a play at the College of Charleston.

Field trips are fun as well as rewarding. Students are able to associate what they would only learn in books with real life situations.

The AP Biology Class took a field trip in September to the beach on Hilton Head Island. While there, they brought a net in from the ocean and the Colleton River to get a sample of the marine life in the Coastal waters. They enjoyed the trip but commented that the water was a little chilly.

Harper Kinsey, a sophomore, concentrates on a Literature pop test. The tenth grade had to adjust to Mrs. Linder's English course and realized all the rumors about the difficulty of her class were true.
