

Learning Made Fun

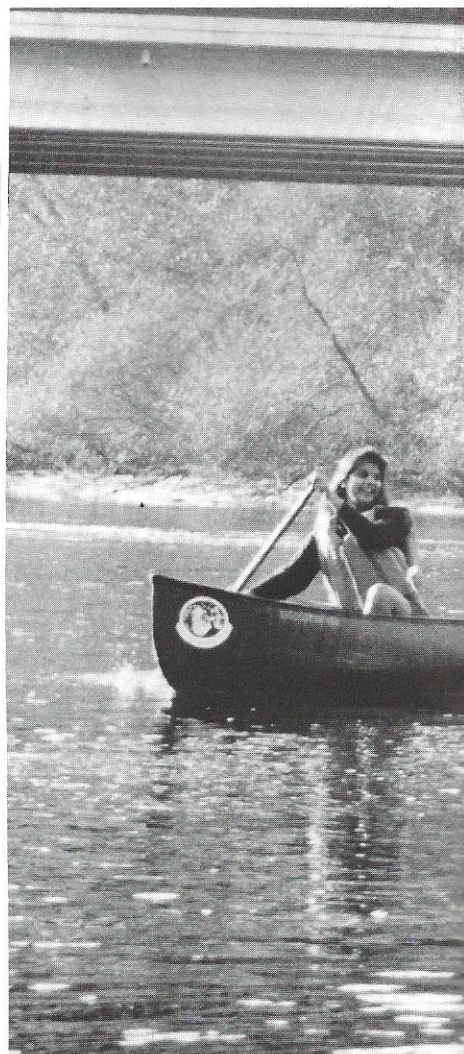

Science Club more than a commitment

The newest club organized at CPA was the Science Club, sponsored by Mrs. Hawes. Anyone in grades 9-12 could be a member and enjoy the many planned activities. This club was formed to generate enthusiasm among the students and to help them enjoy learning.

The club began the year by selecting officers for the 1991-92 school year. Cope Johnston was chosen as president, Tina Patel as vice-president, and Dawn Burros as secretary-treasurer. The club became an official part of the Adopt-a-Highway program and received Academy Road and Calhoun Loop as their clean-up area. On designated days, set by the SC Highway Department, the group met together and picked up the trash littering these roads.

The club went on a canoe trip, guided by Mike Davenport and Charlie Sweat, in October. They spent the weekend canoeing on the Edisto River near Canadys State Park, where they camped. They enjoyed cooking on the open fire, roasting marshmallows, and sleeping under the stars. "It was cool at night, but the weather turned out perfect," stated Cope Johnston.

This new club proved to be a great success. Everyone got together to make suet bird feeders to be sold at the PTO Christmas Bizarre. They also helped with the science fair in January. Everyone enjoyed the various activities that were planned. This was not just a commitment, but an exciting part of school life.

The club participates in the Adopt-a-Highway program by cleaning up the roads near Colleton Prep. These students spent Saturday morning helping with this community project.

Cope Johnston and Dawn Burros make suet bird feeders to be sold at the PTO Christmas Bizarre. This was only one of the many projects sponsored by the new club.
