

The Club

Putting Earth First

The Science Club has been a big part of CPA for the past two years, but this year it changed hands. Mrs. Kluwe became the new head of this organization. Not only was she enthusiastic, she was the only one willing to accept such an undertaking. "I was concerned about having such a large group," said Mrs. Kluwe. "But many participated, which made it enjoyable."

The club began the year by selecting officers. They participated in the Adopt-A-Highway Program three times, which determined who would go on the field trips. "The work paid off with the laughter that was shared on the trips," said Daniel Garris. The club hoped to experience new adventures like traveling to the Science Museum in Charlotte, North Carolina and also delivering flowers on Valentine's Day.

The Science Club was a very well-rounded organization that involved grades 9 through 12. The club increased students enthusiasm about science, helping them to enjoy learning. "My favorite part about being in the Science Club," said Lori Smith, "was helping to clean up the environment."

At the trash pick-up, Lori Smith, Stephanie Padgett, and Daniel Garris find that working together is the best way to get the job done in a short amount of time.
