Nikki,

Tears fill my eyes as I write this for you. From the first moment of your life, you have been a special little bundle of joy. Even when you were so sick, you still smiled. You have grown into a lovely and vibrant young lady. Don't get me wrong, you can be a spitty also. You may look like your Dad but there is some of myself in you too. You can smile in one minute and spit fire in the next. That's what makes you so special. Never lose yourself. Never forget to smile. Never forget to stand up for yourself and others if they need you. Always remember, that I LOVE YOU!!!
