What are teachers? When some teachers were asked, they came up with quite a few complimentary remarks. Teachers are "studious, kindly, gracious and sweet; They're dear from their heads to their feet." Teachers are "frequently having a power shortage." How do students compare to teachers? Teachers are "keys"; students are "locks." Teachers and Parents are "pilots"; Students are the "crew and some are merely passengers." What would we do without all those WONDERFUL Teachers?!!
