

# SUMMER

Summer is a word that always brings a smile. It is a time for going to the beach, taking vacations, working, or just being lazy. For most students, there is a special event that stands out about their summer and carries them through the school year. It may have been a certain party, a new friend, or a summer romance. Someone may have just learned to water ski at the end of the summer and can't wait to try it again. On those scorching hot days, football practice seemed to never end; but the players could await the start of the season with anticipation. If school starts to get you down, remember that there are always those three months of sun and fun to look forward to ... summer!
