

LOVE

What is love? It is the special feeling one has for relatives, teachers, girlfriends, or boyfriends. It is parents going to sporting events to see their children play and the devotion students have for John C. Calhoun Academy.

Love starts at an early age. When little boys pick on little girls, they actually consider them to be their girlfriends. As girls get older, they tend to

have crushes on high school boys and feel as if they will faint when that certain boy walks by. Teenage love becomes more real with couples dating and going to parties and dances; however, along with the fun and happiness comes the heartaches, jealousy, and tears. Although some of these "loves" may die away, they will never be forgotten!
