

Student/Teacher day

Today the students of RMS took the place of teachers. So far, all of the students are having fun taking charge. I wonder how the teachers get up almost everyday and come deal with the students that aren't prepared. Today, we had a lot of fun. I believe the people who did teach got a lot out of it. They acted mature and handled the responsibility well. Every Student /Teacher today learned that they can achieve anything if they try. All in all, I think today really taught the students that a teacher's job isn't easy. My experience on today with students as teachers was good. You think it is going to be easy, but it's not. Especially, when the students don't have their work and aren't prepared for school. It's a good thing for some of the kids. They got to dress up and look good. Being a teacher is pretty good, but it holds a great responsibility. Being a kid is the ultimate coolest, though.
