Row One: J. Sievers, P. Gieck, D. Fischer, R. Randall, M. Shannahan.
 Row Two: A. Carr, J. Katt, S. Harris, J. Weiner, Miss Nuebling, S. Ince, B. Robinson.

The *Biology* club is one of Southwest's very worth while clubs. Formed in 1937 and sponsored by Miss Nagel and Mr. Kottkamp, it has stood the test of time. During one period we find it called "The Junior Academy of Science." It later, however, returned to its original name.

This year's project was to draw up a constitution setting forth the club's aims. These are to increase the members' knowledge of biology, to perfect their skills in this field, and to understand its importance in their lives.

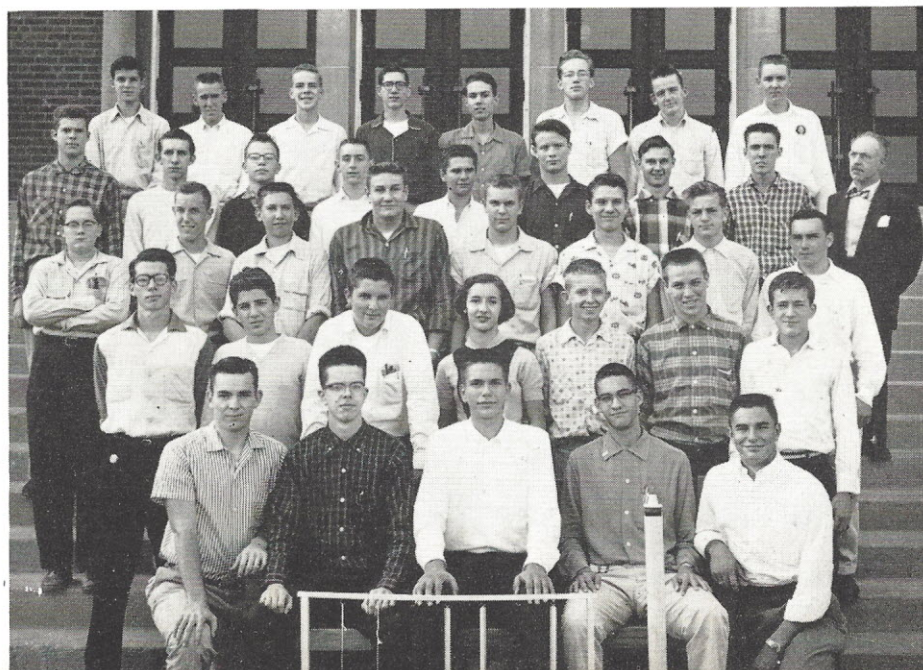

$E=M C^2$ One need not be a member of the Physics Club to know that this is Einstein's Theory. With the arrival of Mr. Pinkus in 1951, came the idea of creating a new science club for Southwest's scientific wizards.

At present these future scientific master minds are interested in research relating to atomic energy. Science has made astounding progress along this line, and today it is of prime importance to our country. If you have a scientific mind, you owe it to Uncle Sam to develop it. Join this Club!

Row One: J. Mullins, B. Howell, G. Gruenewald, L. Conrad, B. Beaty.
 Row Two: W. Taylor, B. Smyrniotis, T. Boone, J. Weiner, T. Browne, J. Baldwin, G. Ziervogel.
 Row Three: J. Burch, J. Vincent, D. Bartholic, J. Meyer, D. Markel, S. Koopmann, G. Link, T. Mason.
 Row Four: R. Carpenter, J. Buehler, K. Velten, G. LeGrand, B. Steinkamp, T. Stenger, D. Sherman, A. Ruehl.
 Row Five: D. Becherer, T. Cook, J. Bauer, J. Eggers, R. Thoene, S. Meyer A. Kriemelman, B. Biggar, Mr. Pinkus.
