

# Bicentennial Celebration Enriches Social Studies Classes

South Carolina and U.S. History classes were enhanced by the study of our nation's Bicentennial Celebration. They used this theme as a basis for weekly reports. Geography and Western Civilization students concentrated on writing summaries of the six weeks activities for their projects. Debating, constructing models and modeling costumes of various countries highlighted the year for World History students.

To a boy who is good in basketball and is as smart as a computer I have enjoyed being in your study hall. Have a nice summer  
Stewart Kennerly
