

Science And Basic Geometry Puzzle Students

Science projects occupied much of the time of Lower School science students. Teachers invited speakers from S.C. Electric & Gas and they

ordered science equipment to aid in various experiments.

The fourth, fifth, and sixth grade math students worked hard to im-

prove their skills in using fractions and decimals, as well as bases and exponents. The students also began basic geometry.

MR. TED LITCHFIELD: Administrative Assistant; Math; 6th.

MRS. LOUISE STONE: Social Studies; Math; Science; 4th.

1. During math class, two students discuss the upcoming Saturday basketball game.
2. Before turning in her math test, Sheila Garrick checks for mistakes.
3. Lower School science students display objects collected on a nature hike.
4. A look in a microscope provides Teresa Cook with insight into pond life.
