

2nd Grade Discovers Its Surroundings

This year United States history came alive to the second graders. They studied about the Mayflower and the Pilgrims and now view Thanksgiving with a new outlook.

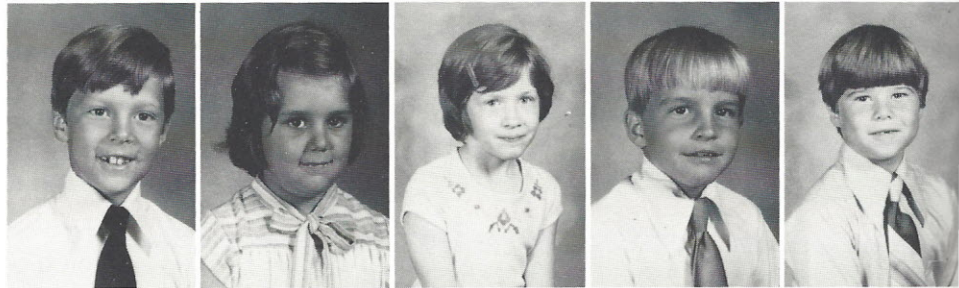

They studied many maps of Orangeburg and found for themselves where their homes are situated. These students were very scientific-minded this year. They

learned about the atmosphere and explored the use of X-rays in studying bones. The world of plants intrigued them as they grew their own bulbs and trees.
