

Coming Of Spring Means New Experiences

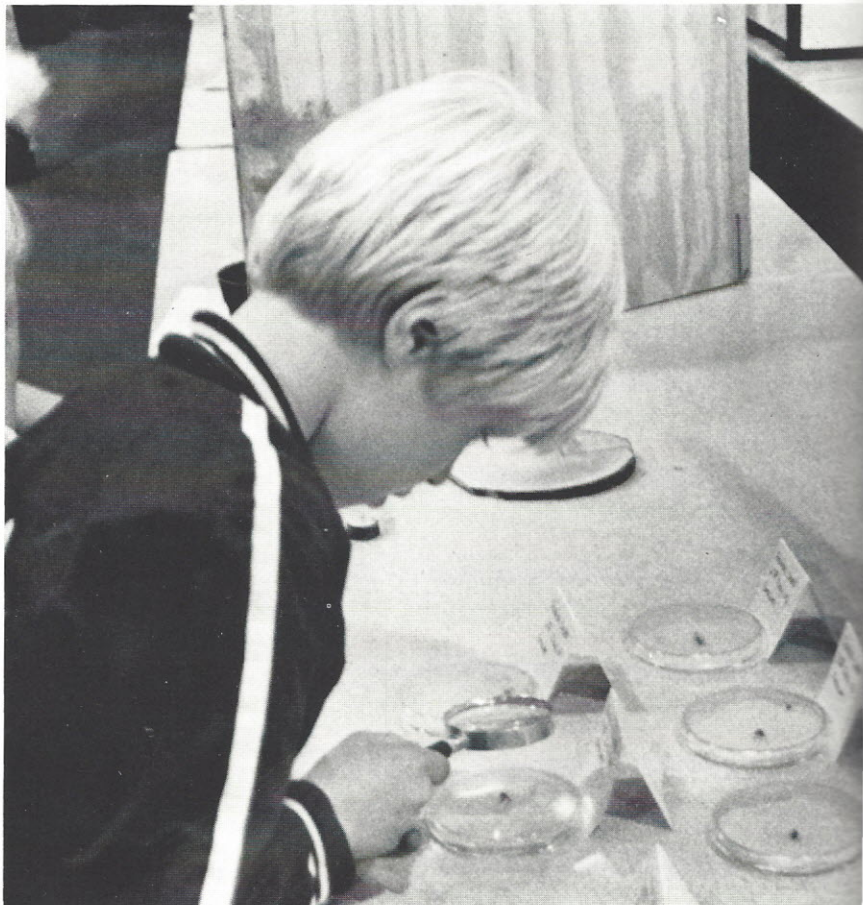

Anticipation marked the coming of spring and new events. The kindergarten children looked forward to becoming first graders in the Lower School. Graduation culminated their wishful thinking when Mr. Burns presented their diplo-

mas. Sixth graders, in graduating, were losing "senior privileges" and becoming the newest students in the Upper School. Mr. Ted Litchfield presented the diplomas and wished each student the best of luck in the Upper School.

The Science Fair added to the excitement of the school year. The Senior Physical Science entries were the largest ever. Seven entrants that represented WHA in state competition won awards in their respective fields.

1. Kindergarten presents "Around the World" as the program for graduation.
2. First grader John Parker examines culture dishes through a magnifying glass.
3. President Matthew Albergotti welcomes the guests to sixth grade graduation.
4. At the Science Fair, Archie Maddox demonstrates his project to Phil Tyler.
5. Sophomores Bobby Clary and Andrea Myers set up projects at the State Science Fair.
6. During Sixth Grade graduation, students and parents stand for the Alma Mater.
