

Second Graders Achieve Higher Goals

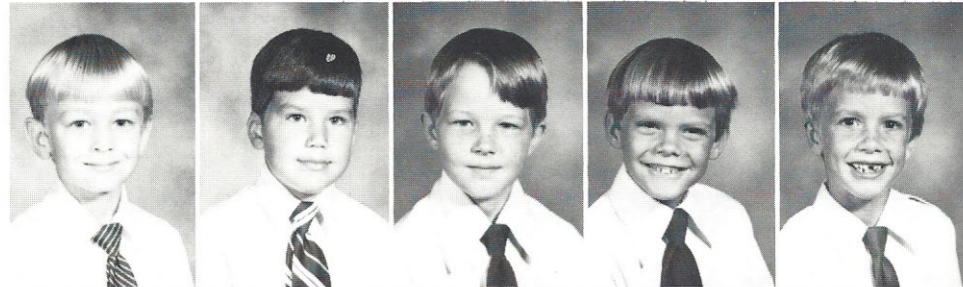

Second graders were introduced to a new aspect of learning this year. They learned new skills in English, math, and science. Cursive writing proved to be one of the more difficult obstacles to tackle. Book reports and other projects were also introduced to

second graders. The students were kept busy with weekly visits to the library and music period. They also enjoyed a visit to the zoo. Through cheerleading camp and frequent pep rallies, the second graders became more aware of school life.
