"Handle with care!"

WHS students are inquisitive and eager to learn about everything from "What makes grass green?" to "What is nuclear fission?" To satisfy this thirst for knowledge the Science Department offers general science, psychology, biology, chemistry, and physics.

This year a group of WHS students visited several "I thought the lab was for experiments!"

Science

places of scientific interest, including Oak Ridge, to get a first-hand view of scientific achievements.

Mrs. Margaret Lytchfield heads the science department of WHS.
