

# The Science of Modern Agriculture

The Future Farmers of America, sponsored by Mr. Dempsey, is a volunteer organization of boys studying vocational agriculture at Walterboro High School. It is designed to supplement the regular instruction by providing opportunities for training in leadership. Vocational education in agriculture is an integral part of our school program. Its function is to educate students in the science of modern agriculture. The training is designed to qualify students in a specific area.

The projects of the Future Farmers of America this year were a calendar sale, a candy sale, and shop projects, including making equipment.

Are our Future Farmers taking or selling the candy?
