

Science Club Helps NASA Go to the Moon.

The Walterboro Science Club is composed of those students who are taking or have taken chemistry and physics and have maintained a three point zero average. The Walterboro chapter works in affiliation with the Junior Engineering Technical Society (JETS).

In cooperation with its sponsor, Mrs. Margaret Lytchfield, the Science Club attended state JETS's conventions and toured modern industrial plants. All year the club worked for their tour of Oak Ridge and the National Aeronautics and Space Administration (NASA). They held car washes and other money-making projects for this purpose.

The aim of the Science Club is to introduce interested students to the world of engineering and technology. It is the hope of the club that a clearer understanding to today's science will insure a better tomorrow for mankind.

Guess what, Mike? They have landed on the Moon!
