

Leadership, Character, Scholarship and Service

Leadership, Character, Scholarship, and Service — these outstanding qualities are portrayed by the students who are qualified National Honor Society members. Their hard work in school is rewarded with the honor of membership in this organization. These students must be willing to set excellent examples in behavior and attitude for their fellow students; and in order to maintain their membership, they must continue to show the qualities of leadership, character, scholarship, and service.

The selected students are also given certain responsibilities with their membership. They must strive to improve their school and their community by performing any service that they can to help or guide others.
