

## D.E. Learns and Earns

The students are getting ready for the world of work; they learn while they earn. These are the objectives of Distributive Education. The students enrolled in D.E. work under a cooperative program whereby, they attend school part of the day getting regular academic instruction on how to sell, set up displays, advertise, and carry out the general functions of business enterprises. At work, they practice what they have learned in the classroom.
