

# Clubs Stress Student Interests and Achievement

The Science Club this year planned many excursions but because of the gas shortage, the only trip they made was to the Westinghouse Plant in Hampton, S. C. Other trips that were planned were to the Power Plant in Canadys, and to Virginia to the new atomic bomb plant.

The Av-Lib Club at Walterboro High had one main duty, and that was to change the bulletin boards in the library. The members attempted to put up a variety of bulletin boards, all the time trying to promote student interest in the library.
