

## Vandalism Continues to Be a Problem

**M**r. Stephens' room ran over with water because of the work of vandals. Mr. Laird's room was covered with broken glass. The Walterboro High Faculty Lounge beverage machine did not operate. The WHS videotape machine was missing. All this and more because of the night activity of vandals.

Last year \$1,500 was spent to repair the work of vandals at WHS, but twice that amount was spent at Colleton High. The total amount of \$4,500 only represented a portion of the damage. Not all equipment was replaced and students missing tennis shoes and other equipment had to replace their own.

Construction of a fence around Colleton High was started in August. With Colleton High away from the main flow of traffic and the lack of recreational grounds in the area it was frequently victimized. Some broke in just to play a game of basketball. Others to get back at a teacher they are unhappy with and still others just to raise Cain.

With the continued increase in the cost to replace items, it put the school system on a treadmill and they found themselves moving slowly backwards. Students were the real victims with less equipment to work with and cold rooms to sit in because of broken windows. Furthermore they missed a number of educational opportunities. Television programs could not be recorded because the videotape machine was stolen.
