## BLOWUPS AND BLOWOUTS

Introducing interested students to the world of engineering and technology was the aim of the Science Club. Mrs. Lytchfield led the club in exploring scientific areas outside of school. During the year the club enjoyed field trips to the Canadys Electric Plant and the Medical University of South Carolina.

A new awareness of the heritage of black people was sought by the Afro-American Club. Members used an assembly, the bulletin board, and the Bicentennial minutes to enlighten others to the customs, culture, and accomplishments of our black forefathers.

**WATCH CLOSELY.** Donnie Baldwin conducts a scientific experiment.
