

# The Academics Act

Rulers, pencils, pens and notebooks—all part of the academics scene. Homework, tests, classwork, and exams made the act complete. Whoever the student or whatever the subject, the same script was followed. Each student strived to reach their goals, whether it was just to pass or excel, or to sing well or just to be a part of a group.

Academics was not just English, Chemistry, Biology and Algebra, it was also carpentry, welding and shorthand. But academics was not limited, it was joyful singing and beautiful art work. It was also a band with the talent and dedication to place first in the State.

With a caring faculty, a good administration and a beautiful facility, the academic year was First Class.

---

The art department annually helps Forest Hills Elementary school during their Halloween Carnival. Theresa Szymanski and Mona Varnadoe share their talent.
