

# Hands At Work

Knowledge is the essential key to the learning of any sort of skill. And knowledge would certainly be necessary for those who showed their skill with their hands at vocational school.

The Vocational School covered a number of hand craft skills such as Stenography, Food Service, Mechanics, Masonry, Welding, Electronics, and Carpentry.

These courses offered a lot of different tactics that were faced but ones hands always helped with the work.

In all, Vocational School was beneficial to the mind as well as the busy "hands at work".

Mr. Chipukities—Head Administrator.  
Mr. Bowmar—Carpentry

Mr. Towers—Welding  
Mrs. Jones—Food Service
