

# Get a Job

The Colleton Area Vocational School offered 250 students one of ten trades available. At least seventy percent of the students were expected to go on to the career area in which they were trained.

Senior Kevin Kubik planned to work at Bosch in the area of machine tool which was instructed by Mike Horsley. Kevin also placed first in machine tool in the District IV Trade and Industrial Skills contest. Senior Scott Smoak placed second in Architectural Drafting in the same contest.

"I plan to go to Savannah College of Art and Design. Someday, I hope to have my own business," Scott said.

The Vocational School sponsored a "C-F athon" which raised money for people who had cystic fibrosis. Students from the entire Vocational School received pledges to walk, run, jump rope and shoot basketball to raise money for the charity.

The school seized the opportunity to upgrade three of its courses through grants given by the Education Improvement Act. The drafting class received new Computer Assisted Drafting computers that allowed the student to do anything on this computer that could be done on the drawing board. The electronics course, which received the largest grant, installed new equipment that allowed a student to repair a computer by completion of the course. The auto mechanics course was equipped with a new laser alignment machine that helped students learn more about the auto mechanics field.

The students at the Vocational School seized the opportunity to learn a skill to prepare them for life-long learning in the area in which they were trained.
