

Jeremy Jones, Joey Walters, and Remy Brennan are eager to get class over.

"Computer class can be a very laid back experience," says Kimberly Harrell.

William Varn takes computer class serious. He knows Dr. Koho is always watching.

The Class of 2007 has big plans for the next three years. Hope their dreams come true.

Freshmen Are The Best

*Freshman
Class excels
academically
and
athletically*

The Freshman Class has a bright future. They are eager to learn and are quite capable of reaching their goals. You can expect great things to happen for them both academically and athletically.

Remy Brennan and Joey Walters are new to the Freshman class. The Class of 2007 would like to grow a little so they won't have to work so hard when it comes time to "build" a prom!

Like all teenagers the Freshman Class enjoys time away from school with their friends. The guys like sports and checking out the girls. The girls like talking on the phone, shopping, and being with friends.
