

The positions and motions of the earth, moon, and Venus around the sun are demonstrated by Mrs. Sease with the aid of the Planetarium.

## Science

Students at Bells find excitement and adventure among the Bunsen burners, test tubes, and apparatus, scales, dead worms, frogs, and pigs, plastic models of the human body and its organs, and charts which are a part of the general science, biology, and chemistry courses offered this year.

Juanita and James assemble apparatus for experiment in preparation of nitric acid.
