

Best of 2018

My favorite class is biology because I enjoy the experiments. The best trip was when I went to Washington, where we went to many different monuments and saw many different locations, like the Abraham Lincoln Memorial, the Smithsonian Museum, and the Washington Monument. I like to play soccer on the field during the weekends, and during my free time in the week I have basketball practice which I also like.

My favorite things to do at CMA are to just be with my friends and spend time with the people inside my company. It really is great the friendships that you get from just staying with other cadets in a barracks for 7 days a week and for most of the year. It's like you have 49 brothers. Another thing that I love about being here in CMA is the trips, like the Washington trip, and others. The trips that we take are great because they find all the best things to do in the area that we are going to. It is really a plan to make us experience the best of the area that the trip is in.
