

Spartan Challenge 2015

In the Frisbee Challenge, cadets throw a disk down the field to be caught in buckets by their teammates. At the Glider Challenge, cadets test their engineering skills, designing paper gliders, and compete in achieving the longest flight times. On the football field cadets were faced with the Brick Challenge, the Soccer Challenge and the Bucket-Toss Challenge. The Brick Challenge entails cadets working as a team, some on the shoulders of others, to build a tower out of bricks. The winner of this is determined by the height of their tower.
